China s Communist Party dominates state and society in China, is committed to maintaining a permanent monopoly on power, and is intolerant of those who question its right to rule. Nonetheless, analysts consider China s political system to be neither monolithic nor rigidly hierarchical. Jockeying among leaders and institutions representing different sets of interests is common at every level of the system. A test of the political system will come later this year, when the Communist Party plans to usher in a new set of top leaders at its 18th Congress. China s last two major political transitions, in 1997 and 2002, unfolded relatively smoothly. This year, the political system has been shaken by the recent ouster of a senior Party leader, Bo Xilai. The unity of the remaining leadership remains unclear. The report opens with a brief overview of China s leading political institutions. They include the Communist Party and its military, the People s Liberation Army; the State, led by the State Council, to which the Party delegates day-to-day administration of the country; and the National People s Congress (NPC), China s unicameral legislature. The NPC is meant to oversee the State Presidency, the State Council, the Supreme People s Court, the Supreme People s Procuratorate (China s public prosecutor s office), and the military. In practice, the legislature is controlled by the Communist Party and is able to exercise little oversight over any of those institutions.
