A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

It is 2048, and the Great Collapse was considered one of the preeminent natural disasters in human history. Mother Nature rebelled against its inhabitants leaving humanity in a shattered schism. When the Great Collapse finally surrendered, a second chance was given to humanity by starting an extraordinary journey to rebuild society. Echo Santori, a daughter of an inventor, devises a plan to merge society into a single government known as the New World Organisation. However, many didn't agree to a unified government based on influential prophecies. As factions played against each other, man and machine must discover if the old prophecies are either true or false. Soren Salus, an augmented iX Special Forces soldier disguised as an engineer, is chosen by his father to team up with the mighty Orphanics in fulfilling old prophecies by exposing the NWO.
