Wearable Projects with Raspberry Pi Zero

By Thomas Hamilton

Packt Publishing - ebooks Account. Paperback. Condition: New. 233 pages. Dimensions: 9.2in. x 7.5in. x 0.4in. **Key Features** A practical and interesting guide that exposes you to amazing wearable projects. Feel like a superhero by creating messages in air using a glove and protecting people. Stay connected to Amazon cloud with a Star trek Communicator. **Book Description** Raspberry Pi Zero is a revolutionary product announced by Raspberry Pi foundation that provides powerful features in spite of being a tiny chip. It has created a lot of buzz in the market from the fact that it was out of stock within 24 hours post its announcement. This book will focus on leveraging its size by building amazing wearable projects as it is half of model A but offers twice the power. We will teach how this small device can be used in wearable technology like a fitness hat which can be used to track your outdoor pursuits, small smartwatch sized LCD displaying time, embedding a Pi Zero into a glove along with LEDs, Listening to music by adding basic audio output to Pi Zero. Finally, you will also learn to build a stunning head-up display which can be used for night vision. By the end of this book...

Reviews

Definitely among the best book I have got possibly study. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Olga Ledner MD**

Complete guide for publication enthusiasts. I have read and i am sure that i will going to study again once again in the future. Your way of life period will be transform once you total looking over this publication.
