Condition: New. Publisher/Verlag: Springer, Berlin | Theory and Applications Proceedings of an International Conference, Fernuniversität, Hagen, FRG, August 20-24, 1990 | Modern production concepts can be considered as an essential field of economics nowadays. They help to give valuable insights and thus provide important competitive advantages. There is a broad variety of new approaches to Production Planning and Control (PPC), Just-in-Time (JIT), Flexible Manufacturing Systems (FMS), Flexible Automation (FA), Automated Guided Vehicle Systems (AGVS), Total Quality Control (TQC), and Computer Integrated Manufacturing (CIM), all of which are indispensable cornerstones in this context. This book presents in a condensed and easy-to-comprehend form the different contributions of a group of internationally recommended scientists. The varied approaches to modern production concepts are not only based on theoretical foundations but also go one step further in that they present the implementation of these concepts and methods in detail. This close link with practical aspects will help to illuminate the theoretical material for researchers and students in universities. The book will be of major importance for practitioners involved in solving everyday industrial problems. The interdisciplinary nature of these contributions will help to create a new and valuable perspective on the field of production concepts. | I: Production Planning and Control.- 1. Constitutive Aspects.- A Theoretical Basis for the Rational Formation of Production Planning and Control (PPC) Systems.- Comparison of Two Production Logistics Concepts.- Multi-Period Production Planning and Managerial Accounting.- Flexibility of Production Control Systems.- A Quantitative Measure for Flexibility.- Applications of Operations Research in Hierarchical Production Planning.- 2. Aspects and Elements of Production Planning and Control (PPC)-Systems.- Hierarchical Approach to Production Planning and Scheduling: The Case of a Mosaic Tile Plant.- Operational Control of Automated PCB Assembly lines.- A Framework for Developing Production Control Systems: A Case in Coffee Roasting/Distributing.- The Impact of Forecast Errors...
