

Supporting production system development through Obeya concept

By Shahbazi, Sasha / Javadi, Siavash

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | An exploratory multiple case study | The manufacturing industry, as an important part of the European and Swedish economies, faces many challenges with growing global competition. One of the challenges is transformations from a cost-based to a value-based focus. To do so, manufacturing companies need to improve their production and processes; these improvements can be incremental (Kaizen) and radical (Kaikaku). This manuscript was written in 2012, studying Obeya concept as a supporting tool for production system development for incremental and radical changes. Obeya concept originates from Toyota Production System, implies a big meeting space to help development projects by facilitating visualization of data, communication and involvement of for a project team. Four lean manufacturing companies in Sweden have been studied and results show a great opportunity in Obeya's application to improve innovative production development projects. | Format: Paperback | Language/Sprache: english | 123 gr | 221x152x6 mm | 80 pp.

Reviews

This book is great. It is written in simple words and not difficult to understand. I discovered this pdf from my dad and I suggested this ebook to find out.
-- Prof. Webster Barrows

This ebook is fantastic. We have read and I also am confident that I am going to go to read through again yet again in the future. I am easily can get a pleasure of reading a published ebook.
