The Curiosity Paradox - Part I: An Introduction to Dynamic Evolution: A Comprehensive Alternative to Darwinian Evolution

By MR Michael a Barber

Createspace, United States, 2013. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Dynamic Evolution offers a comprehensive challenge to the Darwinian premise that the diversity of life is explained solely by the natural selection and survival of the fittest. It will become apparent from a complete study of this work that the principle of the selection of strong functions / properties of life and living organisms, whilst providing a partial fit and a compelling argument, falls under the shadow of the complete picture provided by Dynamic Evolution. Just as a large multi-piece mosaic can appear quite beautiful and coherent, even when some of the pieces do not quite make the right fit (they look almost right ; the emergent patterns can still be impressive and instructive), the picture they present seems to lack something. A comparison with the more accurate paradigm, with the pieces in elegant continuity exhibiting many contiguous patterns, becomes the preferred arrangement. This work endeavors to demonstrate that Dynamic Evolution, by virtue of the coercive argumentation used and the fecundity and uniformity of the inter-connected principles covered, provides a greater number of correctly fitting pieces of...
