

## Airspace Systems Program: Next Generation Air Transportation System, Nextgen Systems Analysis, Integration and Evaluation Project: Version 1.0;

Filesize: 5.43 MB

### **Reviews**

*The most effective book i ever read through. It can be rally fascinating throught looking at time period. Your lifestyle span will be enhance when you complete looking over this publication.*

*(Maribel Kerluke)*

**AIRSPACE SYSTEMS PROGRAM: NEXT GENERATION AIR TRANSPORTATION SYSTEM, NEXTGEN SYSTEMS ANALYSIS, INTEGRATION AND EVALUATION PROJECT: VERSION 1.0;****DOWNLOAD**

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The key objectives of the NASA ASP are to: Improve mobility, capacity efficiency and access of the airspace system. Improve collaboration, predictability, and flexibility for the airspace users. Enable accurate modeling and simulation of air transportation systems. Accommodate operations of all classes of aircraft. Maintain system safety and environmental protection. In support of these program objectives, the major goal of the NextGen-SAIE Project is to enable the transition of key capacity and efficiency improvements to the NAS. Since many aspects of the NAS are unique to specific airport or airspace environments, demand on various parts of the NAS is not expected to increase equally as system demand grows. SAIE will provide systems level analysis of the NAS characteristics, constraints, and demands such that a suite of capacity-increasing concepts and technologies for system solutions are enabled and facilitated. The technical objectives in support of this goal are the following: Integration, evaluation, and transition of more mature concepts and technologies in an environment that faithfully emulates real-world complexities. Interoperability research and analysis of ASP technologies across ATM functions is performed to facilitate integration and take ASP concepts and technologies to higher Technology Readiness Level (TRL). Analyses are conducted on the program s concepts to identify the system benefits or impacts. System level analysis is conducted to increase understanding of the characteristics and constraints of airspace system and its domains.
