Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from **A Study Course in Elementary Chemistry: Prepared Especially for the Instruction and Training of Students of the American School** Scope of book. This book is not to be taken as a complete text in elementary chemistry. It is frankly compiled for use With a textbook. In offering it, it is hoped that the lack of laboratory work may be compensated for by the frequent citation of chemical reactions Which have an application in daily life and industry. The purpose has been to make this book, in so far as it is possible, take the place of class instruction. Little new subject matter has been introduced. Much repetition Will be found. This was felt to-be necessary to give proper emphasis to certain topics. The course does not claim to be the full equivalent of the usual high school course in elementary chemistry Where laboratory work accompanies the study of the textbook; it does, however, cover essentially the same topics. It is believed that a study of these pages in connection With the reading of the reference text book Will give the student such general knowledge of the principles of chemistry as will be useful in forming a part of his general education. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
