The Mists of Special Relativity Time, Consciousness and a Deep Illusion in Physics

By Stephen Earle Robbins PhD

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 74 pages. Dimensions: 8.7in. x 5.8in. x 0.1in. The standard interpretation of Special Relativity is that of the space-time block, where the past, present and future are laid out in a vast, frozen structure. The origins of the block rest in Langevins 1911 announcement of the twin paradox, the validity of this paradox also invariably being included as part of this standard view. The view is ubiquitous, is described repeatedly, and is completely misguided. This book explores the fundamental contradictions in this interpretation, its inconsistencies in the assignment of ontological status to time dilation versus the opposite for space contraction, its failure to properly factor the reciprocity of systems, the ultimate non-ontological status of the block and thus the non-status of relativity as a theory of time. In this, the work explores the problems for a theory of consciousness and perception inherent in the block, the extensions of certain of the inconsistencies into the foundations of the General Theory, and the origins of relativity in the classic metaphysic of space and time - now outmoded. In contrast to the classic structure, the temporal metaphysic of Bergson...
