A Retrospective View of the Progress of Horticulture in the United States during the year 1847. By the editor. After four successive years of unusual drought in the Eastern States, that of 1847 was one of more than the average of moisture; vegetation of all kinds has been vigorous, rapid and healthy: crops have been abundant and good, and, with the exception of the still-continued potato rot, no season could yield a richer harvest. Fruit trees of all kinds have made a remarkably fine growth, and, though the fall was protracted and mild unusually late, the wood ripened well, and the promise of fruit another season is excellent. January last was a rather mild and favorable month, with but little unpleasant weather, and with scarcely any snow. February was ushered in with snow, continued variable with more snow, and the last week of the month was severely cold. March was a rather cold month; the first week...
