

Specialization of Quadratic and Symmetric Bilinear Forms

By Manfred Knebusch

Springer-Verlag GmbH Sep 2010, 2010. Buch. Book Condition: Neu. 23.5x15.5x cm. Neuware - A Mathematician Said Who Can Quote Me a Theorem that's True For the ones that I Know Are Simply not So, When the Characteristic is Two! This pretty limerick rst came to my ears in May 1998 during a talk by T.Y. Lam 1 on old invariants from the theory of quadratic forms. It is-poetic exaggeration allowed-a suitable motto for this monograph. What is it about At the beginning of the seventies I drew up a specialization theory of quadratic and symmetric bilinear forms over \mathbb{F}_2 . Let K/L be a place. Then one can assign a form $(\)$ to a form over K in a meaningful way if it has 'good reduction' with respect to $(\)$ (see 1.1). The basic idea is to simply apply the place to the coefficients of $(\)$, which must therefore be in the valuation ring of $(\)$. The specialization theory of that time was satisfactory as long as the field L , and therefore also K , had characteristic 2. It served me in the first place as the foundation for a theory of generic splitting of quadratic forms [33], [34]. After a very modest beginning, this theory is now in full...
