

Some Mathematical Models from Population Genetics: Ecole d'Ete De Probabilites De Saint-Flour XXXIX-2009

Filesize: 6.05 MB

Reviews

It is great and fantastic. I actually have read and so i am certain that i am going to going to go through once again yet again in the future. I realized this ebook from my dad and i encouraged this book to find out.
(Dr. Kayden Gerlach)

SOME MATHEMATICAL MODELS FROM POPULATION GENETICS: ECOLE DETE DE PROBABILITES DE SAINT-FLOUR XXXIX-2009

To read **Some Mathematical Models from Population Genetics: Ecole dEte De Probabilites De Saint-Flour XXXIX-2009** PDF, please refer to the button below and download the file or have access to other information which might be relevant to SOME MATHEMATICAL MODELS FROM POPULATION GENETICS: ECOLE DETE DE PROBABILITES DE SAINT-FLOUR XXXIX-2009 book.

Springer-Verlag Berlin and Heidelberg GmbH & Co. K. Paperback. Condition: New. 120 pages. Dimensions: 9.1in. x 6.1in. x 0.4in. This work reflects sixteen hours of lectures delivered by the author at the 2009 St Flour summer school in probability. It provides a rapid introduction to a range of mathematical models that have their origins in theoretical population genetics. The models fall into two classes: forwards in time models for the evolution of frequencies of different genetic types in a population; and backwards in time (coalescent) models that trace out the genealogical relationships between individuals in a sample from the population. Some, like the classical Wright-Fisher model, date right back to the origins of the subject. Others, like the multiple merger coalescents or the spatial Lambda-Fleming-Viot process are much more recent. All share a rich mathematical structure. Biological terms are explained, the models are carefully motivated and tools for their study are presented systematically. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
