Make your environmental lab--and lab technicians work practices--the safest possible. *Protect workers from hazardous material they handle on-site *Protect the civilian population from harm in a hazardous materials emergency *Prevent accidents before they happen The purpose of Safe Work Practices for the Environmental Laboratory is twofold: 1.For the person designated as the laboratory s Chemical Hygiene Officer or Safety Officer, this text is a user friendly reference that will provide a format, a template, a guide to compliance with OSHA s Laboratory Standard (29 CFR 1910.145); and 2.for the person who is assigned to work in the environmental laboratory, this user-friendly text provides the information needed not only to perform routine laboratory tasks correctly, but also to perform them safely. The environmental lab is involved with performing analytical testing and sampling protocols relating to air, soil, biosolids, sludges, drinking water, wastewater, groundwater, stormwater, waste characterization, petroleum products, and HRSD/NPDES effluent studies. Many wastewater treatment plants and water works have their own environmental laboratories. These labs primarily perform analysis of process conditions to ensure optimization of the process. However, even these small labs (a few are quite large) perform environmental sampling and therefore are environmental labs. The actual genesis of the environmental laboratory can be attributed to the environmental regulations that have been generated by USEPA, AOAC, ASTM, NIOSH, OSHA, and other regulatory and advisory entities. The typical environmental laboratory contains several different types of hazards the lab worker must guard against. This is the case even though modern environmental laboratories have been designed to take maximum advantage of engineering controls that work to engineer-out...
