Springer, Netherlands, 2012. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.My personal interest in cardiac Doppler arose from long experience in diagnosing carotid artery disease using Doppler continuous wave ultrasound with frequency spectral analysis. The work of Dr. Liv Hatle of Trondheim, who was then using analogue tracings for cardiac Doppler, inspired me to try CW Doppler combined with spectral analysis and high-pass filtering techniques. The results with this system, without benefit of standard echocardiography were so productive that a special instrument was produced by Carolina Medical Electronics for worldwide marketing. Our experience led to the development of an international symposium and training program. These symposia gave birth to the International Cardiac Doppler Society and Volume I of this book series. This second volume on Cardiac Doppler Diagnosis is an outgrowth of the success of Volume I and the excellent work of many clinical scientists. Doppler instrumentation continues to improve with integration of both continuous wave and pulsed wave Doppler with echocardiography. Color directional Doppler imaging techniques led by your Japanese colleagues is finding acceptance as a rapid screening method to find special regions of interest where more quantitative continuous wave with its quantitative capabilities...

### Reviews

*This book is definitely worth acquiring. I have gone through and so I am certain that I will likely read through again in the future. It's been printed in an exceptionally basic way in fact it is only after I finished reading this publication in which it actually altered me, changed the way in my opinion.*
