

Private Foreign Investment in Developing Countries: A Quantitative Study on the Evaluation of the Macro-economic Effects

By H. C. Bos, M. Sanders, C. Secchi

Springer, Netherlands, 1974. Paperback. Book Condition: New. 235 x 155 mm. Language: English . Brand New Book ***** Print on Demand *****.This study is the result of research undertaken by the Netherlands Economic Institute, Division Balanced International Growth, Rotterdam, under the auspices of the O.E.C.D. Development Centre. In the division of labour agreed with professor Grant L. Reuber, who directed a parallel study under the auspices of the Centre , the N.E.I. research deals with the evaluation of economic effects of private foreign investment in developing countries. The effects studied are confined to macro-economic effects which are quantifi- able. The lack of a satisfactory methodology for the assessment of these effects seemed to justify this limitation in the approach to the evaluation of private foreign investment. The study is organized as follows. Part I reviews briefly and critically the literature about the evaluation of private foreign investment and suggests the need for an appropriate macro-economic methodology. Part II develops the principles and techniques for such a methodology which is applied empirical- ly to data for five developing countries in Part III. While Parts II and III are concerned with the effects of aggregated volumes of private foreign invest- of the...
