Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Chicago City Manual, 1916 A great story, the greater for that scientifically it is true, has been written by William C. Alden for the benefit of science, and published by the Department of the Interior. The title of the story is-lake Chicago. To find it, one goes to the Report of the Geological Survey of the United States, Chicago Folio, explained in extensive text, and illustrated by several maps of various sizes, A copy of this report is in the library of the department of geology, presided over by Professor Charles J. Chamberlain, at the University of Chicago. On a recent occasion, this obliging professor opened it to the compiler of the City Manual, and spoke him a short lecture on particular and general topics that are embraced in the atlas-folio. Now an effort shall be made - following the text by Mr. Alden and the verbal observations of Professor Chamberlain, with some glances at the remembered maps - to write an intelligible, though brief, account and description of Lake Chicago - a glacial lake formed in years without a summer, - nobody knows how many thousand years ago. We must begin the story, and there is no other way than at once go to the teachings of geology as to conditions during the glacial occupation of the Chicago district.
