So, this paper starts with a classic of implicit knowledge and continues by widening this concept into the social sphere. Finally, it brings together the concept of non-explicit knowledge with social capital and stresses its importance for sustainability. , abstract: The Brundtland report introduced in the 1980's the terminus Sustainability. In this term there is obviously much more included as simply eco friendly or environmentally sound. In the first instance, the term focuses on the discussion about the dealing with resources for the following generations. The popular three-pillar model of sustainability illuminates that the idea of sustainability orientates besides on ecological as well on economical and on social criteria. Obviously, the former on environmental-ecological issues restricted theme is widened on social concerns. This paper focuses on the social sphere of sustainability. The...
