

Evaluating Urban Resilience to Climate Change: A Multisector Approach (Part 2 of 2)

By National Center for Environmental Assessment U.S.

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 346 pages. Dimensions: 11.0in. x 8.5in. x 0.8in. Due to the size of this book, we had to make into 2 Books. This is Part 2 This report was prepared by the U. S. Environmental Protection Agencys (EPAs) Air, Climate, and Energy (ACE) research program, located within the Office of Research and Development, with support from the Cadmus Group. The ACE research program provides scientific information and tools to support EPAs strategic goal of taking action on climate change in a sustainable manner. Such action includes both mitigation, which involves reductions in the movement of heat-trapping greenhouse gases into the atmosphere, and adaptation, which involves preparing for and adjusting to the expected future climate. Both are important, but this report focuses on adaptation to climate change. Climate change impacts are diverse, long-term, and not easy to predict. Adapting to climate change is difficult because it requires making context-specific and forward-looking decisions regarding a variety of climate change impacts and vulnerabilities when the future is highly uncertain. Cities are on the front line for responding to potential climate change impacts, but often do not know precisely the qualities or...

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

-- Mr. Grant Stanton PhD

A whole new eBook with an all new standpoint. It is actually rally fascinating through reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).
