

Hiding Text Using Image Steganography

By Kaur Sukhpreet

LAP Lambert Academic Publishing. Paperback. Condition: New. 60 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. Steganography is a technique of hiding data behind some file like image, text, audio video etc. for security reasons. Image Steganography deals with hiding data behind images. It has many techniques depending upon the type of image used for data hiding. Existing techniques provide security but the capacity is left behind. The technique discussed in this work provides a perfect match between the security and capacity. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
