Excerpt from Combined Monthly Report: Branch of Research; August, 1926 The standard of accuracy should be determined by the circumstances and the class of the investigation. Good judgment and common sense must decide the degree of accuracy that is needed in each part of an experiment. The only excuse for doing an atomic weight determination is the possibility of excelling previous work in accuracy. In redetermining the physical constants of organic compounds the same statement holds. In determining the constants of a new compound the standards accepted by the best investigators in that field should be regarded. Thus densities should be determined to four decimals. It is usually sufficient to state melting and boiling points to the nearest degree. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
