## ONLY THE LONGEST THREADS

Paul Dry Books. Paperback. Book Condition: New. Paperback. 212 pages. Dimensions: 8.5in. x 5.5in. x 0.9in. Science is done by real human beings, with human concerns. Only the Longest Threads tells a story that conveys the human side of science in a way that is as moving as it is accurate. Sean Carroll, theoretical physicist at Caltech and author of *The Particle at the End of the Universe* Only the Longest Threads will thrill readers with its dramatic and lucid accounts of the great breakthroughs in the history of physics: classical mechanics, electromagnetism, relativity, quantum mechanics, quantum field theory, and string theory, each from the viewpoint of a (fictional) witness to the events. Tasneem Zehra Husain re-imagines the pivotal moments in the history of physics when radical new theories shifted our perception of the universe, and our place in it. Husain immerses the reader in the immediacy and excitement of the discoveries and she guides us as we begin to understand the underlying science and to grasp the revolutionary step forward each of these milestones represents. Tasneem Zehra Husain writes lyrically, poetically about life, love, and physics. I highly recommend this wonderful book for anyone interested in what physics, and indeed all of science, is about. She masterfully describes the most momentous moments in physics history with verve and talent. Amir D. Aczel, bestselling author of *Fermat's Last Theorem* A delightful meditation on the development of modern physics, culminating in the discovery of the Higgs. Husain follows the thread of its creation through a dialog between a journalist and young theory student, and as seen through the eyes of witnesses. John Huth, Donner Professor of Science, Harvard University Well-written and cleverly constructed, this book takes us on a journey through the history of physics as a series of fictional adventures, loosely linked by another fiction, the...
