

Now the Chips Are Down: The BBC Micro (Hardback)

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

NOW THE CHIPS ARE DOWN: THE BBC MICRO (HARDBACK)

MIT Press Ltd, United States, 2016. Hardback. Condition: New. Language: English . Brand New Book. The story of a pioneering microcomputer: its beginnings as part of a national Computer Literacy Project, its innovative hardware, and its creative uses. In 1982, the British Broadcasting Corporation launched its Computer Literacy Project, intended to introduce interested adults to the world of computers and computing. The BBC accompanied this initiative with television programs, courses, books, and software -- an early experiment in multi-platform education. The BBC, along with Acorn Computers, also introduced the BBC Microcomputer, which would be at the forefront of the campaign. The BBC Micro was designed to meet the needs of users in homes and schools, to demystify computing, and to counter the general pessimism among the media in Britain about technology. In this book, Alison Gazzard looks at the BBC Micro, examining the early capabilities of multi-platform content generation and consumption and the multiple literacies this approach enabled -- not only in programming and software creation, but also in accessing information across a range of media, and in do-it-yourself computing. She links many of these early developments to current new-media practices. Gazzard looks at games developed for the BBC Micro, including Granny's Garden, an educational game for primary schools, and Elite, the seminal space-trading game. She considers the shift in focus from hardware to peripherals, describing the Teletext Adapter as an early model for software distribution and the Domesday Project (which combined texts, video, and still photographs) as a hypermedia-like experience. Gazzard's account shows the BBC Micro not only as a vehicle for various literacies but also as a user-oriented machine that pushed the boundaries of what could be achieved in order to produce something completely new.
