Springer. Paperback. Condition: New. 540 pages. Dimensions: 9.0in. x 6.0in. x 1.2in. This volume is addressed to professionals and students in community mental health-including researchers, clinicians, administrators, educators, and students in relevant specialties within the fields of psychology, psychiatry, social work, public health, and nursing. The intent of this book is to serve as a practical resource for professionals and also as a didactic text for students. In addition, the volume seeks to make a theoretical contribution to the field by presenting, for the first time in book form, a behavioral-ecological perspective in community mental health. We present behavioral-ecology as an emerging perspective that is concerned with the interdependence of people, behavior, and their sociophysical environments. Behavioral-ecology attributes mental health problems to transactions between persons and their settings, rather than to causes rooted exclusively within individuals or environments. In this volume we advance the notion of behavioral-ecology as an integration of two broad perspectives--behavioral approaches as derived from the individual psychology of learning, and ecological approaches as encompassing the study of communities, environments, and social systems. Through the programs brought together in this book we are arguing for a merging of these two areas for purposes of advancing theory, research, and practice in community mental health. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
