Reviews

*Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).
(Pasquale Larkin I)*

THE BARRIER FACTORS IN GIPSY MOTH TREE-BANDING MATERIAL (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Barrier Factors in Gipsy Moth Tree-Banding Material That the two factors of (1) odor, and (2) soft and semiviscid condition, operate together in enabling the gipsy moth tree-banding material to halt the caterpillars in their efforts to ascend to the foliage, was clearly demonstrated by the qualitative tests described in this paper. The first series, in which the solid odorous bands were used, could not be considered conclusive, for physical or technical reasons (p. But it, indicated clearly that the first element, namely, odor, exercises at least a restraining influence. The second series, in which bands made of actual gipsy moth tree-banding material were used, demonstrated satisfactorily that the soft and semiviscid; or viscous, condition of the material is the basic or primary factor. The odor restrained, indeed, but when acting alone did not completely check; whatever dislike or fear it inspired Was overcome sooner or later? This series approximated closely to actual conditions, especially in the case of the narrowly bridged bands, in which the odor, after the strips of cloth became saturated with the material, was but little if at all interfered with or masked; indeed, the total odor emitted by some of these bands was far greater than would have been emitted, under the same conditions, by the smaller sized standard band, the odor being strong enough in the warm and rather confined atmosphere of the laboratory to irritate to a considerable degree, at a distance of about 2 feet, the nasal membrane of the writer. The various check. Bands used, namely, our paste, our-molasses, molasses, and also a commercial sticky tree-banding material, served very well, and if the last three were somewhat more viscous...
