LEARN CHESS FAST BY SAMMY RESHEVSKY

Ishi Press. Paperback. Condition: New. 152 pages. Dimensions: 8.0in. x 5.0in. x 0.4in. IN THIS remarkable book, a great master and a great teacher have collaborated to produce what is probably the clearest and simplest guide to the game ever written. Containing more than 300 diagrams, Learn Chess Fast! Has been specially designed and streamlined to impart a knowledge of chess in an entertaining and effortless manner. This book is attractively produced to introduce many thousands of Americans to the delight of the Royal Game. Learn Chess Fast is a basic chess beginners book written in a rare collaboration between the strongest chess player in America and possibly the world at that time and the best and prolific writer about the game of chess. This book teaches the legal moves of chess plus it explains the descriptive notation by which chess games were recorded. After that, it explains the basic principles of the game and shows some tricks and traps. It concludes with some examples of grandmaster play. Although being in descriptive notation is a negative, there are positives. This is a beginners book and beginning players usually find descriptive notation easier. Also, this book teaches descriptive notation and this explanation is not often to be found in modern books. These older books really teach chess better, at least in my opinion. The newer books are often compilations based on computer printouts from databases containing millions of master games. I do not believe that the newer books are equal to the older books in pure instructional value. Even I have learned something from reading this book. On page 46, it presents an opening trap I had never seen before. It goes like this: 1. P-K4 P-K4, 2. Kt-KB3 Kt-QB3 3. B-Kt5 Kt-B3 4. P-Q3 Kt-K2 Here Black has set a trap...
