China's circular economy strategy initiative to assume responsibility for the sustainable development of the future generations. is not only important to solve the country's resources. the ecological crisis. while also addressing the global the resources. the ecological crisis is of great significance. Circular economy in China. though not an automatic copy mode. but can be induced by other more. a broader measures. thus contributing to the world in a broader range of coping resources. the ecological crisis. Summary circular economy - the looming ecological problems hope to show that. in the process of social development. the Chinese circular economy is how to fit with the innovation of the world economy attempts. Wealth of industrial production cycle. given the ecological factors critical place. because the ecological factors play an irreplaceable role in the protection of the ecosystem. The circular economy is bound to involve all kinds of people: business executives. technicians. scientists. land improvement workers. the public sector and private enterprise staff. In short. all with land improvement more or less some relationship. If the 20th century is the health of the century (in France after World War II issued a Health Law). just opened a new century...
