When Helen McCain begins experiencing terrible migraines, neither she nor her family realize that this is the first step in a long, harrowing journey that will span almost a decade-and end in her death at the hands of Alzheimer s disease. At the time, Helen, her college professor husband, and their nurse daughter acknowledge the headaches are bad-but have no idea that they signal the presence of an insidious disease. It isn t until she begins forgetting simple things she has always known-how to cook meals, how to get home from the store-that her daughter suspects Helen needs a thorough neurological examination. As her dementia progresses, her husband s ability to care for Helen at home diminishes. After a series of specialists determine that Helen needs around-the-clock, skilled care, the family makes the painful decision to move her to a nursing home. Tackling a difficult topic with compassion and insight, the McCain family shares the painful story of Helen s illness in the hope of helping other families navigate the frustrations of the medical and government systems-and bear the burden of caring for a loved one with Alzheimer s disease.
