Excerpt: . ity and utility of the plan had become sufficiently demonstrated, it might be made compulsory, in the sense that every money debt of, say, more than three months standing, would be varied according to the tabular standard, in the absence of an express provision to the contrary. As shown in Appendix V, 2, plans very similar to the above are now actually employed to some extent. 4. Direct Anticipations We next cite the writings which describe plans substantially like that proposed in this book (i.e. plans for adjusting the weight of gold in a monetary unit by the aid of an index number of prices) and which were published earlier than the author's Purchasing Power of Money. For others who anticipated the idea but did not publish, see Preface. John Rooke. Inquiry into the Principles of National Wealth. Edinburgh, 1824. The regulation...
