Createspace, United States, 2013. Paperback. Book Condition: New. 224 x 196 mm. Language: English . Brand New Book ***** Print on Demand *****.Why is the sky blue? Why do things fall to the ground? How do seeds grow? What makes the sound and music? Where do mountains come from? Young children ask their parents hundreds of questions like these. In search of answers, we use science to both enlighten and delight. Being scientific involves being curious, observing, asking how things happen and learning how to find the answers. Curiosity is natural to children, but they need help understanding how to make sense of what they see and to relate their observations to their existing ideas and understandings. This is why parental involvement is so important in children s science education. When we encourage children to ask questions, make predictions, offer explanations and explore in a safe environment, we lend them the kind of support that they need to become successful science students and scientific thinkers. As a parent, you don t have to be a scientist or have a college degree to help your child learn science. What s far more important than being able to give a technical explanation of how a telescope works is your willingness to nurture your child s natural curiosity by taking the time to observe and learn together. Science happens all around us every day, and you have endless opportunities to invite your child into the wonders of science. Without expensive chemistry sets, equipment or kits, a child can be introduced easily to the natural world and encouraged to observe what goes on in that world. When you least expect it, a moment for learning will occur: A bit of ice cream drops on the sidewalk and ants appear; some cups float and some...
