Excerpt from Introductory Address, Delivered at the College of Physicians and Surgeons, New York: October 16, 1855 If we are sometimes tempted to think that medicine has, so far, made little progress, it is only because the subject is so complicated and its extent so boundless. The avenues that it opens to us stretch out so far into the future that the space already passed over seems small in comparison. But it is small in comparison only. In every complicated department of human knowledge progress is at first slow and difficult, opposed by obstacles, retarded by unavoidable errors, which must be corrected by subsequent examination. The pioneers of Medicine had no royal road to follow. Their landmarks were few, and easily mistaken. Their route led over intricate passes or through close and tangled thickets. Sometimes they were obliged to cross trembling and insecure morasses and sometimes, with laborious strokes of the hammer and crowbar. They must force their way through ledges of the solid rock. What wonder is it that they were sometimes misled by false landmarks, and wandered off into impassable wastes, or...
