paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 159 Publisher: Southwest Jiaotong University Press. Pub. Date :2006-05. In this paper the vibration of railway rolling stock rolling test bed studies. and in the following aspects of the system studied: (1) systematically discussed the necessity of combining rolling vibration. developed the world s second rolling vibration test stand. Rolling vibration test stand trial as a rolling test of the dynamic performance of an effective means of railway rolling stock in the world play an important role in the development. This paper outlines the dynamics around the world rolling test bed for the development of the existing rolling. vibration test stand for the systematic introduction and comparison. Orbit about the use of static test rig vibration spectrum as a rolling track analog input excitation. and to explore its scientific rationality; discusses the vibration is a combination of rolling and rolling stock the best way to predict performance. On this basis. developed China s first. world second rolling the vehicle rolling vibration test stand. Thesis of the test-bed program in the form and key technologies. describes the test bed architecture. system components. the main parameters. functional situation. Through an experiment to test the test stand to meet the dynamic simulation of rolling stock operating speed. vibration and accuracy requirements. The paper also describes the test bed since its inception in 1995. the completion of large-scale trials of new rolling stock situation. as an example because there are scientific and rational design route. developed a successful test bed. in our high-speed. heavy rolling stock the development process played an important role. (2) for the first time to derive three-dimensional wheel more Contents: 1 Introduction 1.1 1.2 rolling stock rolling stock...
