THE STERADIAN TRAIL: BOOK #0 OF THE INFINITY CYCLE

Westland Limited, New Delhi, India. Softcover. Book Condition: New. M. N. Krishns novel The Steradian Trail: Book #0 of The Infinity Cycle has just been released in India by Westland Books to rave reviews. It is a highly original mystery-thriller that unravels hidden connections between computers, technology, religion, culture and an intelligent crime that will wow readers. When the MIT professor of computer science, Joshua Ezekiel comes down to India for an academic visit, little does he know that this particular trip is going to be memorable in more than one way. Professor Lakshman, Joshua Ezekiel's long time friend and batch mate is going to be compelled to take on more than what he thought he was responsible for, when he got instated as Head of the Department of Computer Science of a prestigious technological institute of the nation. Divya, Professor Lakshman's brilliant protégé might have made a breakthrough, pleasantly surprising her mentor. But convincing her mother that she needs to concentrate on her work instead of learning how to cook or stringing together prayer notes is not going to be an easy task. The Steradian Trail: Book #0 of The Infinity Cycle opens with a murder that sets everything into motion. The events lead Joshua, Lakshman and Divya through a confusing yet enthralling maze of secrets and revelations. This involves ancient temples and traditions, in a race against time to understand the trail of secrets left by a dead man whose actions might have an effect more profound than imaginable.
