

Enantiopure biologically active compounds by lipase catalysis

By Jacobsen, Elisabeth Egholm

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Influence of reaction medium and substrate structure | For several years enzymes and whole cells have been used as catalysts both in Academia and Industry. Such catalysts are now used in research for renewable energy and for production of fine chemicals. Enzymes are used in organic chemistry in particular for their ability to catalyse reactions stereoselectively. In order to create enantiopure building blocks for synthesis of biologically active compounds Dr. Jacobsen has used lipase for kinetic resolution. This book covers the significance of chirality for biological action, principles of enzyme catalysis and in particular the use of enzyme catalysis for kinetic resolution and asymmetrization. | Format: Paperback | Language/Sprache: english | 156 pp.

Reviews

Certainly, this is actually the very best job by any author. It really is rally exciting throgh studying time. You may like how the blogger write this pdf.
-- **Rudolph Jones MD**

Completely essential go through ebook. I was able to comprehended almost everything using this created e pdf. You will not sense monotony at anytime of your time (that's what catalogs are for relating to if you request me).
