Condition: New. Publisher/Verlag: Springer, Berlin | The spectrum of repetitive decisions required to control a complex production system can dramatically impact the financial results of a manufacturing company. This book contains detailed descriptions of practical control and decision techniques. | The financial results of any manufacturing company can be dramatically impacted by the repetitive decisions required to control a complex production network be it a network of machines in a factory; a network of factories in a company; or a network of companies in a supply chain. Decision Policies for Production Networks presents recent convergent research on developing policies for operating production networks including details of practical control and decision techniques which can be applied to improve the effectiveness and economic efficiency of production networks worldwide. Researchers and practitioners come together to explore a wide variety of approaches to a range of topics including:WIP and equipment management policies,Material release policies,Machine, factory, and supply chain network policies for delivery in the face of supply and demand variability, andConflicts between complex production network models and their controlling policies.Case studies and relevant mathematical techniques are included to support and explain techniques such as heuristics, global and hierarchical optimization, control theory and filtering approaches related to complex systems or traffic flows. Decision Policies for Production Networks acts as handbook for researchers and practitioners alike, providing findings and information which can be applied to develop methods and advance further research across production networks. | 1.An Overview of Decision Policies for Production Networks.- 2.Modeling and Control of Manufacturing Systems.- 3.The Ongoing Challenge for a Responsive Demand Supply Network: The Final Frontier-Controlling the Factory.- 4.WIP-Oriented Dispatching in Complex Manufacturing Facilities.- 5.Controlling a Re-entrant Manufacturing Line via the Push-Pull Point.- 6.JEDI: Just-in-Time Execution and Distribution Information Support System for Automotive Stamping Operations.-7. A Control Theoretic Evaluation of Schedule...
