J Ross Publishing, United States, 2015. Hardback. Condition: New. Language: English . Brand New Book. By some estimates, knowledge workers outnumber all other workers in North America alone by a four to one margin. Knowledge work and knowledge workers vary with each profession, depending on the industry - from software developers to engineers, architects to pharmaceutical researchers, and so forth. They are usually responsible for exploring and creating ideas, new products, new designs or perhaps new models for doing business to help their organization achieve or maintain a competitive advantage. As much of this type of work is intangible, productivity is a mystery to most business executives, managers and team leaders. This unique reference shows how to lead knowledge workers, manage knowledge work and build a hyper-productive knowledge work organization, by taming and managing the four flows of organizational performance (psychology, information, work and finance) to produce spectacular operational and financial throughput results. Inspired by his experience and knowledge gained at Borland International, where a hyper-productive level of performance was achieved resulting in the most productive software project ever documented, author Steve Tendon devised TameFlow. TameFlow is an approach that can be superimposed on any preexisting process, method, and practice to enable performance improvement by several orders of magnitude and a state of hyper-productivity. It is adaptable to nearly every industry, and can be applied to any knowledge work domain or organization that generates business value through knowledge. TameFlow blends and merges different ideas from a variety of schools of thought. It is founded in pattern theory and organizational performance patterns which are used to analyze and decompose processes, methodologies, and management practices into constituent parts to observe productivity patterns, and then they are recombined in new configurations to enable hyper-productive levels of performance. In this volume of The TameFlow Hyper-Productivity Series, the TameFlow approach...
