Reviews

Certainly, this is actually the very best job by any author. it was writtern very flawlessly and beneficial. I found out this publication from my dad and i recommended this ebook to discover.

(Magali Robel)

DATABASES, INFORMATION SYSTEMS, AND PEER-TO-PEER COMPUTING: SECOND INTERNATIONAL WORKSHOP, DBISP2P 2004, TORONTO, CANADA, AUGUST 29-30, 2004, REVISED SELECTED PAPERS

Springer. Paperback. Condition: New. 232 pages. Dimensions: 9.1in. x 6.1in. x 0.6in. Peer-to-peer (P2P) computing promises to offer exciting new possibilities in distributed information processing and database technologies. The realization of this promise lies fundamentally in the availability of enhanced services such as structured ways for classifying and registering shared information, verification and certification of information, content-distributed schemes and quality of content, security features, information discovery and accessibility, interoperation and composition of active information services, and naturally market-based mechanisms to allow cooperative and non-cooperative information exchanges. The P2P paradigm lends itself to constructing large-scale complex, adaptive, autonomous and heterogeneous database and information systems, endowed with clearly specified and differential capabilities to negotiate, bargain, coordinate, and self-organize the information exchanges in large-scale networks. This vision will have a radical impact on the structure of complex organizations (business, scientific, or otherwise) and on the emergence and the formation of social communities, and on how the information is organized and processed. The P2P information paradigm naturally encompasses static and wireless connectivity, and static and mobile architectures. Wireless connectivity combined with the increasingly small and powerful mobile devices and sensors pose new challenges to as well as opportunities for the database community. Information becomes ubiquitous, highly distributed and accessible anywhere and at any time over highly dynamic, unstable networks with very severe constraints on the information management and processing capabilities. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
