OPTIMISING THE AWJ CUTTING PROCESS OF DUCTILE MATERIALS BY SUPERIMPOSING NOZZLE HEAD OSCILLATIONS

Optimising the AWJ cutting
process of ductile materials
by superimposing nozzle
head oscillations

Engida Lemma

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | An experimental and theoretical research work on abrasive water jet oscillation cutting of ductile materials, mild steel and aluminum, was conducted at the water jet laboratory of IRIS as part of a PhD project. The general objectives of the PhD project were improving and modeling the cutting performance in AWJ machining using nozzle oscillation Techniques. Optimizing the cutting process involves improving the texture and integrity of the surface produced by abrasive water...

Reviews

This kind of book is every little thing and taught me to looking forward and a lot more. It is really simplistic but excitement in the fifty percent of the pdf. Your life span is going to be change once you comprehensive looking at this publication.

-- **Mr. Wiley Kilback V**

A must buy book if you need to adding benefit. It is among the most incredible book we have study. I discovered this book from my dad and i recommended this book to find out.

-- **Ida Oberbrunner**
