Routledge. Paperback. Book Condition: New. Paperback. 320 pages. Dimensions: 9.1in. x 6.4in. x 1.2in. This lucid, accessible, thought-provoking discussion of issues related to equity in science education reform is for science educators, including idealists and exacting pragmatists, who are dedicated to exploring what it means to put into practice rallying cries like science literacy for all, equity and excellence, and standards-based reform. Intended as an enjoyable and stimulating read, as opposed to a comprehensive summary of everything ever written about equity in science education, it is a response to the new science education standards and reforms, with their goal of science literacy for all. If this goal is to be taken seriously, the implications are immense. A central purpose of this book is to project and discuss how achieving this goal would affect science education reform and vice versa. The work is research based, using statistics, tables, and figures drawn primarily from NSF reports and other public information documents to provide a foundation for equity concerns. However, these statistics are not the main focus of the book. Rather, they are used to make a case, backed by pertinent research, the literature on best practice, and provocative examples from schools and classrooms. Charts, tables, and graphic organizers provide visual evidence and enhance the arguments presented. Moving from research-based studies to classroom stories, *Equity and Science Education Reform* encourages readers to think about the complexity of the issues. No easy answers or quick fixes are offered. Researching across identity areas and attempting to unite them in a discussion that recognizes both the common elements as well as important distinctions, it provides a comprehensive picture of equity concerns across ethnicity, class, gender, and location. Encompassing a broad literature in science education, reform and policy, and equity issues, it offers an equity schema as a...
