C For an extended experience, see the next paper. III. Pg 35 AN INQUIRY INTO THE EFFECTS OF THE PROLONGED ADMINISTRATION OF THE BROMIDES IN EPILEPSY. D The present inquiry is the result of an experience of 300 cases of epilepsy treated by myself with the bromides of potassium and ammonium. In all of these the clinical facts, as well as the progress of the malady, were carefully studied and recorded. The effects of the administration of these remedies on epileptic seizures I have already investigated and demonstrated in a somewhat elaborate series of observations. E Further experience has confirmed the correctness of the general propositions then arrived at, so that they need not again be elaborated in detail. At present it is proposed to direct attention to the effects of the prolonged administration of large doses of the bromides, and to attempt to ascertain if, while arresting or diminishing the frequency and severity of the paroxysmal symptoms, they beneficially influence the disease itself, or in any way injuriously modify the constitution of the patient.
