

## Advance nano ceramic PZT sensors

Filesize: 7.47 MB

### ***Reviews***

*Extremely helpful to all of group of individuals. It really is loaded with knowledge and wisdom Its been designed in an extremely basic way and is particularly simply after i finished reading through this ebook where actually altered me, affect the way i believe.  
(Lily Ryan)*

## ADVANCE NANO CERAMIC PZT SENSORS

LAP Lambert Academic Publishing Jan 2015, 2015. Taschenbuch. Condition: Neu. Neuware - Lead Zirconium Titanate (PZT) Electro- Piezo Ceramic system, discovered by Jaffe et. al. finds vast and wide range applications in the field of Electrical and Electronics Engineering as Smart structures, reconfigurable sensors, memory devices, piezoelectric electromechanical actuators and capacitors, due to its well known piezoelectric properties. Since its discovery about four decades back, it has always remained a point of attraction for various researchers and scientists because of its highly modifiable piezoelectric and dielectric properties; obtainable by replacing either whole or a part of the host atom in ABO<sub>3</sub> type perovskite structure of PZT, by foreign ions. Analogous to semi-conductors; these foreign ions are also called Dopants, classified as isovalent, acceptors, and donors. The PZT system is still under extensive research for further improvement in its piezoelectric properties. It has been reported by many authors that significant changes can be achieved by addition of various dopants in PZT with a view to their dielectric and piezoelectric properties. In this book a detailed study of various properties of 'sol-gel' derived PZT for reconfigurable sensors are presented. 104 pp. Englisch.
