The Cause of Menopause Mercury Is Not a Planet

By Toby L Murray Rmt

AUTHORHOUSE, United States, 2015. Paperback. Book Condition: New. 203 x 127 mm. Language: English . Brand New Book ***** Print on Demand *****.In this work Toby L. Murray RMT connects human anatomy and physiology to the Inverse Square Law and the Biological Tides Theory in support of the hypothesis that the Moon s gravity generates a Monthly Cranial Respiration Cycle in cerebral spinal fluid which induces the secretion of neuro-endocrine hormones thus regulating bodily functions such as menstruation. This hypothesis further proposes that as the Moon steadily moves further away from Earth in a process known as the Lunar-recession the Monthly Cranial Respiration Cycle diminishes leading to conditions such as menopause, disease, and aging in-general. The author combines the ideas of the late astronomers Drs. Thomas Van Flandern and Robert Harrington with Newtonian Mechanics and General Relativity to demonstrate that Mercury is the moon to the planet Venus which separated from Venus in a process similar to the Moon s recession from Earth. The resulting new models of the solar and planetary systems are that of atoms of eight life essential elements with properties belonging to the group of non-metals on the Periodic Table of Elements.

Reviews

Extensive guide! Its such a excellent read. This can be for anyone who statte that there was not a worth looking at. I am just effortlessly will get a satisfaction of looking at a written publication.

-- Melvin Hettinger

This book will not be effortless to start on reading through but very exciting to learn. It is amongst the most remarkable book i have got go through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dr. Easton Collier DVM
