Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 edition. Excerpt: .to number of experi-ments included) + 0 025 which value represents a line so nearly straight that it would deviate from straightness by only 4 cal, from 9--25, or 6 cal. from 3--25, whereas the actual results show a deviation of 152 cal. between these last-mentioned limits. The results from 9--25 are, therefore, not conformable with those from 9--3. Thus in every way in which the results are examined they undoubtedly favour the straight line as opposed to the curve method of representation. In answer to Professor Tilden s question referring to the results given in Table I, Mr, Pickering said that he thought it obvious why he should have taken the increase of 42 to 50 cal. (9--8) as significant of a true alteration in the rate, and should not have regarded the diminution of 45--33 cal. (18--17) as having any significance at all: in the latter case the difference of 45 cal is evidently an exceptionally high result, unsupported by any other observation, which when combined with the differences immediately preceding and following it (36 and 33 cal.) gives the same mean as 16 differences from 25 to 9, whereas the difference of 50 cal, while higher than any differences preceding it, is identical with the mean of the five differences which succeed it (8--3). He thought that no theoretical speculation should induce us to reject the more correct method of representing his results in favour of the less correct method. Finally...
