Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Physical Measurement of Young Children, Vol. 18: A Study of Anthropometric Reliabilities for Children Three to Six Years of Age Dr. Knott's review of the literature in Chapter II of this volume reveals that, for ages three to six years, a systematic study of the reliability of anthropometric measurements has not been previously undertaken. It is known that this lack of knowledge on reliability has resulted in lessened work efficiency. The present data are based on thirty-five physical measurements for a good sampling of preschool children. Differences in the observations of two technicians are analyzed and, for some measurements, between two observations by the same technician. Of special interest are Dr. Knott's estimates of the approximate frequency of measurement considered profitable during the preschool years: stature, ten times a year; hip width, sitting height, leg girth, and total arm length, three to four times a year; head, chest depth and elbow width, every two years; and the remaining measurements chiefly once a year. The study, as a whole, forms a unit in the anthropometric program being carried on in the Station by Dr. Howard V. Meredith. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
