The inauguration of Washington as first President of the United States (April 30) set a limit to the social and administrative systems of colonial times and began a new national republican organization that was to reach fulfilment after three-quarters of a century of striving. On May 5, 1789, the States General met at Versailles and proceeded to the democratization of France and of Europe. 1 Civil convulsions and wars followed. Their influence extended westwardly across the Atlantic and affected society, politics, commerce, and finance in America. In England, the industrial revolution was vigorously proceeding. The high cost of the raw material hampered the extension of the factory system; but the cultivation of the short staple cotton in South Carolina and Georgia cut in two the price of the fibre, made possible the development of the textile industry in England and in America, and, in consequence, fastened negro servitude on the southern United States. The application of steam to transportation by water and by land in the first half of the new century changed the whole face of civilization by making practicable what had before been impossible. The new conditions of living led Lewis Rosenthal to America and States on France in the XVIIIth Century France: The Influence of the United (New York, 1882). VOL. IV.
