By Association Of Engineering Societies

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Journal of the Association of Engineering Societies, Vol. 18: January to June, 1897 But in some systems there are provisions made and items of expense which benefit the general public and not individuals. For instance, storm water, when allowed to accumulate on the surface of streets, becomes a public nuisance; hence the public should pay for its removal. In many instances, cities assume the whole ex pense of this kind of work. We shall agree that public benefits should be paid by the pub lic. Just how much public interest in the sewers should amount to in assessment should be settled by local conditions. Where the surface water drains and common sewers are combined in one system, then the general public benefit is much larger than in the separate system. The practice is becoming general to build sepa rate conduits for the conveyance of sewage, putting off until future years the construction of complete systems of storm water drains. In case the drainage of water from streets is thrown out and placed among the problems of the future, the general public interest...
