Excerpt from Dynamics of Matter and Mechanical Analysis, a New Departure in Physics: Motion, Force, Work and Power, Set Apart by Definitions That Define; Also Fundamental and Dynamic Energies; Newton s Third Law Vindicated; Conservation Explained; Novelty in Science Mass is a quantity of matter. It is wrong to call inertia or gravitation mass, since these are only properties of matter and not matter itself. Mass weight, often determines commercial value. Shaking and pressure changes the volume of tea hay or cotton, but not the mass nor financial worth. Mass is the sum of molecules, and is the most exact measure of matter. Force weight, is pressure downward caused by gravitation. It is mutual attraction, earth mass being on one side. It is varied by distance from the earth s center.
