BLACK HOLES BUILT OUR COSMOS (TRILLION THEORY) (PAPERBACK)

Jepko Publishing, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.3rd book in the new 5 book Trillion Theory cosmology series by Canadian theory author Ed Lukowich. Is there a black hole living right in our own backyard? Black Holes Built Our Cosmos is an absolute critical part of new Trillion Theory (TT) by Ed Lukowich. Black Holes Built Our Cosmos is the 3rd book in the 5 book cosmology theory series of Canadian theorist Ed Lukowich. This new TT was originated by Ed Lukowich back in 1998, and the news of it is now spreading far and wide. You will be amazed at how important these new TT discoveries promise to be; so vital that the old Big Bang theory will soon forfeit its prominence as the paradigm model for our universe. TT portrays black holes as the crucial architects of gigantic galaxies and organized solar systems. Here is a tiny glance back at the origin of our cosmos: A ruthless black hole feverishly spins as its powerful jaws gnaw away at an ocean of light. Suddenly, strands of light break free - swallowed up by the monster. A pig of an eater, the glutinous entity fills its belly to fabricate itself into a solid sphere. Soon, the encased black hole at the sphere's core extends its force to keep other adjacent smaller spheres in orbit as moons, frantically assembling the first solar system. This incredible smallish start to our universe ushered in an unstoppable recycling process spanning the next trillion years. Cosmic history will witness space growing ever larger as the prolific count of stars today surmounts a ginormous 73 quintillion within billions of galaxies, each galaxy hubbed by a supermassive black hole. Read all about the magical forces within a super-powerful...
