Excerpt: .The description of this case, as given in Dr. Davis s letter has certain important points of similarity with early cases of epidemic influenza, especially as regards the mildness of the local symptoms with the sudden development of temperature, severity of the systemic symptoms and short duration of the fever. In 1919, Rosenau, McCoy and collaborators, working under Government auspices, carried out a series of important experiments on man carefully controlled and elaborately planned. The group conducting the investigation were officers of the United States navy and of the Public Health Service; McCoy, Goldberger, Leake and Lake on the part of the Public Health Service, cooperating with Rosenau, Keegan and Richey, on the part of the United States navy. The experiments were carried out at Gallops Island, the quarantine station near Boston. The volunteers were all between eighteen and twenty-five years of age and...
