Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The monograph is devoted to a very topical issue at the moment - search and development of new compounds having high levels of biological activity based on derivatives of monoethanolamine vinyl ether. The authors summarized and presented a great literary and experimental data in the field of monoethanolamine vinyl ether chemistry, including the latest data, widely covered in prominent publications, as well as their own research on the synthesis, structure, study, chemical transformations and biological activity of monoethanolamine vinyl ether new derivatives. In describing the structure of these classes of compounds are presented in detail and characterized ¹H-NMR, IR spectra and two-dimensional structures, taken with modern high-quality devices, which undoubtedly will greatly assist researchers in deciphering and determining the stereo structure of the new derivatives of N-2-vinyloxiethyl-N'-amino thioureas and oxazolidine-2-thiones. The book will be useful to a wide range of scientific experts, graduates and students of higher education institutions working in the field of natural compounds chemistry, organic chemistry, medicine and pharmacology. | Format: Paperback | Language/Sprache: rus | 128 pp.
