Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1815 Excerpt: . together the second and third terms, and dividing their product by the first term. This is the mode of calculation, when the tables of natural sines, tangents, c. are used. But the operation by logarithms is so much more expeditious, that it has almost entirely superseded the other method. In logarithmic calculations, addition takes the place of multiplication; and subtraction the place of division. The logarithms expressing the lengths of the sides of a triangle, are to be taken from the tables of common loga-N rithms. The logarithms of the sines, tangents, Sfc. are found in the tables of artificial sines, c. The calculation is then made, by adding the second and third terms, and subtracting the first. (Art. 521) 132. The logarithmic radius 10, or, as it is written in the. tables, 10.00000, is so easily added and subtracted, that the three terms of...

Reviews

This pdf is so gripping and exciting. It can be full of knowledge and wisdom I am just effortlessly could get a enjoyment of reading a published pdf.
-- Henri Gutkowski

This ebook is definitely not straightforward to begin on studying but quite fun to read. It is one of the most awesome book i actually have go through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
